

THE LEADER IN PRE-ENGINEERED FIRE SUPPRESSION TECHNOLOGY

Dual-agent technology

Cease Fire combines its unique ABC powder with a clean agent gas to create a dual-agent that provides more efficient fire suppression.

Non-toxic to occupants and environment; EPA-approved fire extinguishing agents.

A single Cease Fire system unit can protect up to 800 cubic feet.

Simple clean up after discharge.

Pressure Switch

Easily installed to existing alarm and monitoring equipment.

Viking Corp sprinkler head

Proven and tested components.

Truly modular

Units are automatic, self contained, and pre-engineered

No electrical installation is necessary – operates in the event of a power outage.

Cease Fire technology enables units to be much smaller and lighter than other systems.

Pre-engineered

No piping require – installation is quick and easy.

45° look down pressure gauge

Convenient and easy maintenance.

Heat activated

This totally unique technology provides you with the most efficient total flooding fire suppression.
